

Project Title:

Bike Dekho – Customer Purchase Behavior Dashboard

Dashboard Description:

Analyzing demographic trends and behavioral factors influencing bike purchases.

This interactive dashboard presents key insights from an analysis of 1,000 customer records to understand the factors influencing bike purchase behavior. It explores trends across demographics such as region, income, gender, age, education, occupation, and commute distance. The goal is to identify high-potential customer segments, evaluate market readiness, and support data-driven marketing and sales strategies.

☒ Total Purchases
